Advisor to Generic Mappings

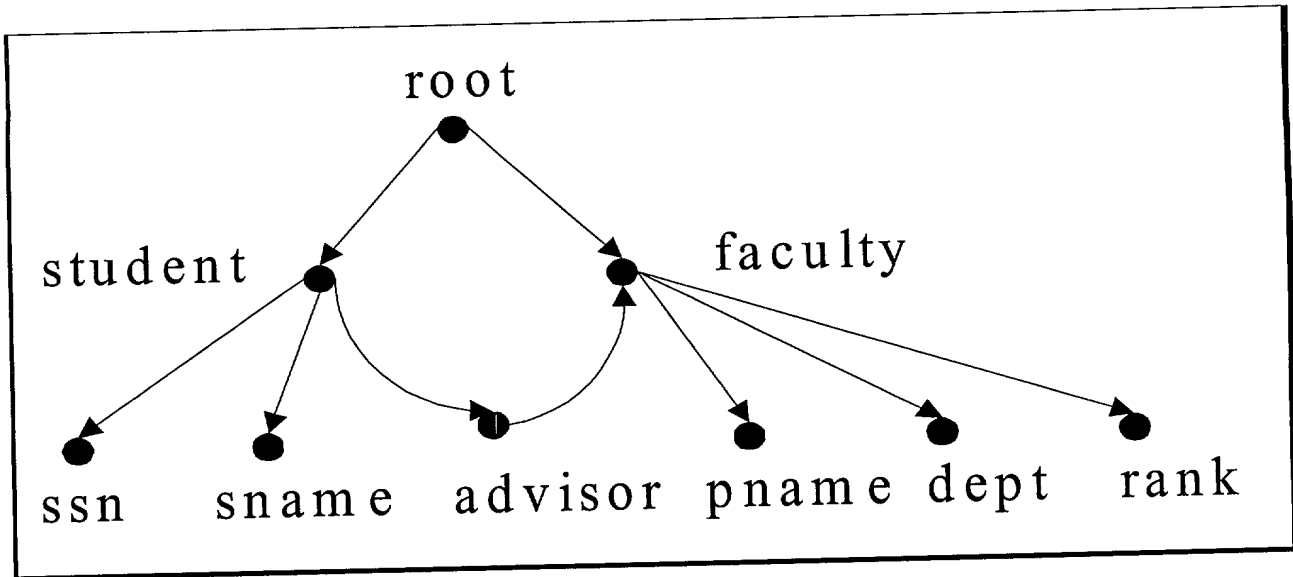

1. $\Phi (\Pi_{\text{dissertation_advisor}}(\text{Advisor})) \Rightarrow \Pi_{\text{advisor.prof_name}}(\sigma_{\text{dissertation} \neq \text{NULL}}(\text{Generic}))$
2. $\Phi (\Pi_{\text{CS_student}}(\text{Advisor})) \Rightarrow \Pi_{\text{student_name}}(\sigma_{\text{major.dept_name} = \text{'CS'}}(\text{Generic}))$
3. $\Phi (\Pi_{\text{good_student}}(\text{Advisor})) \Rightarrow \Pi_{\text{student_name}}(\sigma_{\text{gpa} \geq 3.5}(\text{Generic}))$
4. $\Phi (\Pi_{\text{poor_student}}(\text{Advisor})) \Rightarrow \Pi_{\text{student_name}}(\sigma_{\text{gpa} < 2.5}(\text{Generic}))$
5. $\Phi (\Pi_{\text{prof_rank}}(\text{Advisor})) \Rightarrow \Pi_{\text{rank}}(\sigma_{\text{dept_name} = \text{'CS'}}(\text{Generic}))$

Scheduler to Generic Mappings

6. $\Phi (\Pi_{\text{CS_student}}(\text{Scheduler})) \Rightarrow \Pi_{\text{student_name}}(\sigma_{\text{teacher.dept_name} = \text{'CS'}}(\text{Generic}))$
7. $\Phi (\Pi_{\text{good_student}}(\text{Scheduler})) \Rightarrow \Pi_{\text{student_name}}(\sigma_{\text{gpa} \geq 3.3}(\text{Generic}))$
8. $\Phi (\Pi_{\text{poor_student}}(\text{Scheduler})) \Rightarrow \Pi_{\text{student_name}}(\sigma_{\text{gpa} < 2.0}(\text{Generic}))$
9. $\Phi (\Pi_{\text{lucky_student}}(\text{Scheduler})) \Rightarrow \Pi_{\text{student_name}}(\sigma_{\text{teacher.rank} = \text{'Full'}}(\text{Generic}))$

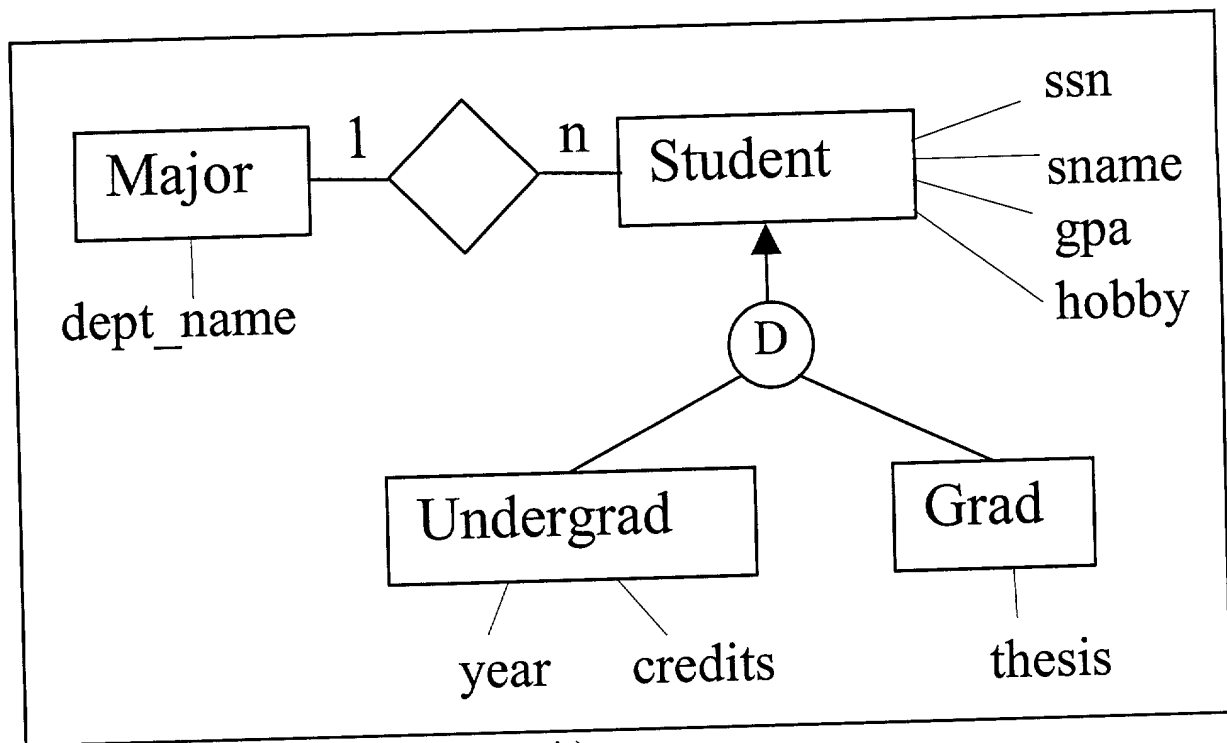

Figure 3. Inter-Domain Mappings

Fig. 3

$\Phi(\Pi_{\text{sname}}(\text{XML})) \Rightarrow \Pi_{\text{student_name}}(\text{Generic})$
 $\Phi(\Pi_{\text{dept}}(\text{XML})) \Rightarrow \Pi_{\text{dept_name}}(\text{Generic})$
 $\Phi(\Pi_{\text{pname}}(\text{XML})) \Rightarrow \Pi_{\text{advisor.prof_name}}(\text{Generic})$

Fig. 4

$\Phi (\Pi_{\text{sname}}(\text{Grades})) \Rightarrow \Pi_{\text{student_name}}(\text{Generic})$

$\Phi (\Pi_{\text{dept}}(\text{Grades})) \Rightarrow \Pi_{\text{dept_name}}(\sigma_{\text{major.dept_name}='CS'}(\text{Generic}))$

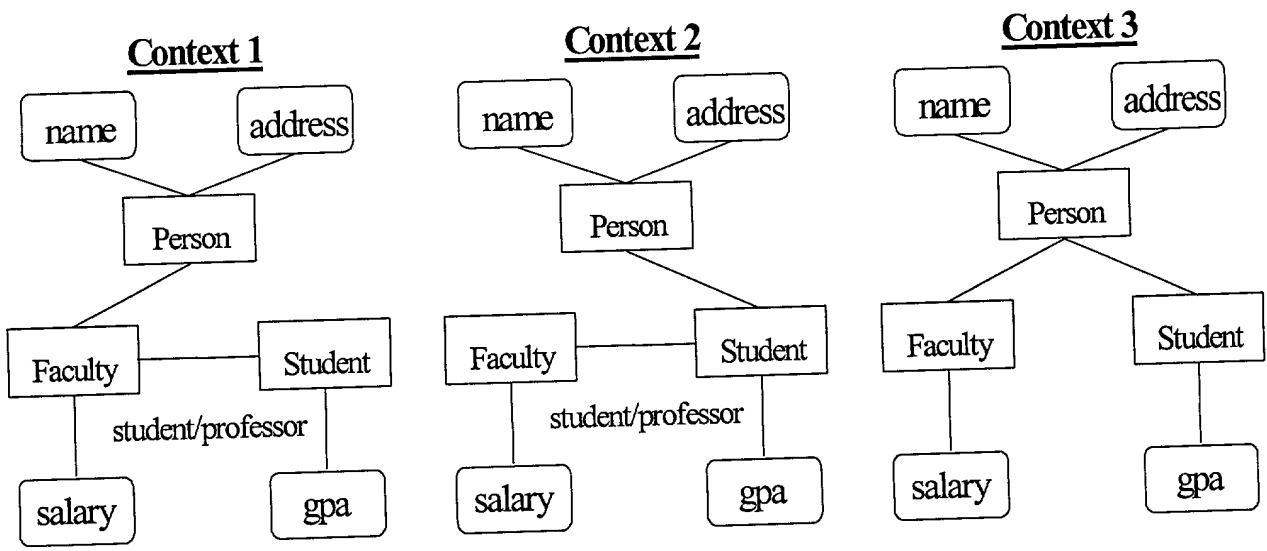

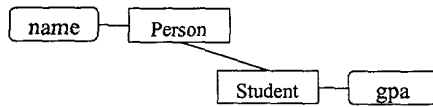

Fig. 11

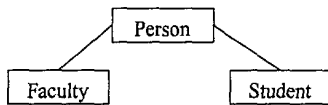

Context for student role (from context 1)

```

SELECT  P1.name
FROM    person AS P1
        NATURAL JOIN student AS S1
        ON P1.name = S1.student_name_fk
WHERE   S1.gpa >= 3.5
  
```

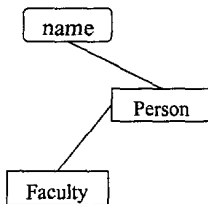

Context for professor role (from context 3)

```

FROM    faculty AS F1
        NATURAL JOIN person AS P2
        ON P2.name = F1.faculty_name_fk
        NATURAL JOIN student AS S2
        ON P2.name = S2.student_name_fk
  
```

Context for professor's professor role (from context 2)

```

SELECT  P3.name
FROM    faculty AS F2
        NATURAL JOIN person as P3
        ON P3.name = F2.faculty_name_fk
  
```

Bridge between student and professor roles

```

FROM    student AS S1                // from student role
        RIGHT OUTER JOIN faculty AS F1 // from professor role
        ON S1.student_professor_name_fk = // bridge
        F1.faculty_name_fk
  
```

Bridge between professor and professor's professor roles

```

FROM    student AS S2                // from professor role
        RIGHT OUTER JOIN faculty AS F2 // from professor's professor role
        ON S2.student_professor_name_fk = // bridge
        F2.faculty_name_fk
  
```
